

AQD-WM

Wall-mounted CO2 Sensor Air Quality Controller

Overview

AQD-WM Wall-mounted CO2 Sensor and Indoor Air Quality Controller Air quality CO2 sensors can be literally applied to every industry. ZKTeco Europe is releasing AQD-WM, the ideal wall-mounted CO2 Sensor and Indoor Air Quality Controller that features the ability to measure up to four following key IAQ parameters: PM2.5, CO2, temperature, and humidity.

Features

Wall-mounted CO2 Sensor and Indoor Air Quality Controller

Multiple sensors: CO2, temperature, and humidity

Rechargeable Li-battery 2000mah, including USB Charging cable 3M

24 hours real time monitoring.

Temperature unit between Celsius and Fahrenheit Switch

Specifications

Screen	Common Screen display
CO2 Detection Technology	Infrared (NDIR)
Temperature	Between Celsius and Fahrenheit Switch
Monitoring	24 hours real time monitoring
Detection range:	CO2 (400-5000 ppm)
Power supply	Rechargeable Li-battery 2000mah, including USB Charging cable 3M
Material	ABS
Product Size	270*90*35MM
Included	Main Unit+manual+charging cable
CO2 Sensing module	HEIMANN sensor from Germany
Chip	Arterytelc
